DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-20, drawn to a wet/dry bare floor cleaner having an actuator connected to the diverter, with diverter being mounted in the working air conduit and movable between a dry suction position and a wet suction position.

Group II, claim(s) 21-26, drawn to a wet/dry bare floor cleaner having an agitator mounted to the base.

Group III, claim(s) 27-32, drawn to a wet/dry bare floor cleaner having a shut-off valve mounted in the recovery tank.

Group IV, claim(s) 33-39, drawn to a wet/dry bare floor cleaner with a handle having a bi-directional grip.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the inventions do not overlap in scope and have different functions, modes of operation, and effects.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

Art Unit: 3723

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
